

2020 Q-1 Interconnection Discussion Forum

MEETING LOGISTICS:

Tuesday March 10, 2020, 1:00pm – 2:00pm

WEB-EX and CALL-IN ONLY

WEB-EX INFORMATION (Visual Only, No Audio):

Start meeting

Meeting number: 719 341 508

Meeting password: Energy1

CALL-IN INFORMATION:

Call-in: 877-932-1845

Participant passcode: 551 2662

AGENDA

1:00 - 1: 05 p.m. – Introduction (Energy Division)

1:05 - 1: 45 p.m. – Customer Data Access (Proposed and Presented by CALSSA)

- The IOUs are required to make customer energy usage data available to customer representatives. Normally a customer that is interested in solar or other energy services signs a customer authorization form because they want the service provider to handle the data analysis along with the system application. Much of the time it is easy for service providers to access that information, but often it is not. According to CALSSA, this is especially the case with SCE. Part of the reason Issue C was a topic of discussion a 2nd time at the Interconnection Discussion Forum was due to a dispute about acquiring data—SCE states they prefer not to give data to vendors and want the request to come from the customer. This is contrary to the customer data authorization rules. This creates a problem—vendors want to provide accurate savings estimates to their customers, but this can be difficult when utilities do not make the data available.

1:45 p.m. - 2:00 p.m. – Wrap Up & Next Steps
