Safety Announcement and Instructions

Utility Emergency Planning and Disaster Response Workshop 2

R.15-06-009 Phase 2

Jeremy Battis

Risk Assessment, CPUC Safety and Enforcement Division

San Diego County

August 28, 2018

Format & Ground Rules - Workshop 2

Busy Day Planned with Many Scheduled Speakers and Panelists

We want to encourage audience comments and participation so let's consider our pace and time management to ensure that all have an opportunity to provide input, and to allow us to end the workshop on time

Presenters, unless cleared in advance by SED staff, should limit their time to no more than 7 minutes; shorter is encouraged

Format & Ground Rules - Workshop 2 (cont.)

Panel Moderators are invited to introduce their panel members and provide a brief introductory statement to speak to their Panel's subject matter as panel members are assembled

Next will follow **Presentations** by Subject Matter Experts within the Panel

After, Panel Discussion program time will consist of a robust 15- to 20-minute moderator-facilitated exchange on issues pertaining to the Panel's topic

Format & Ground Rules - Workshop 2 (cont.)

Remaining Panel program time will consist of **Q&A**, with panelists fielding questions from the audience, and CPUC decision makers and staff

Audience: To be recognized, please raise your hand and CPUC staff will call on you in turn; your cue to present your question is when you have the live mic in your hand – please begin by introducing yourself and your organization or constituency

We don't expect to monitor the webex questions box, so remote participant questions should be submitted by phone

Agenda - Workshop 2

- 9:30- 9:40 a.m. SED Risk Assessment Welcome and Opening Statement and Safety Message
Jeremy Battis, SED Risk Assessment, lead analyst for R.15-06-009
