

**Settlement Year 5 – Fourth Quarter
Progress Report to California Public Utilities Commission
Electric Vehicle Charging Station Project**

*For the period September 6, 2017 through December 5, 2017 (the Reporting Period)
Submitted January 5, 2017 by NRG Energy, Inc. on behalf of the Dynegy Parties¹*

EXECUTIVE SUMMARY

As of December 5, 2017, (the Reporting Date), EVgo had a total of 208 Freedom Station sites either constructed or under development. During the Reporting Period, EVgo operationalized 20 additional Freedom Station installations, for a total of 195 completed sites. There were an additional 5 locations that had completed construction and were waiting on utility interconnection to be operationalized, bringing the construction complete count to 200. One of these 5 has since been energized, bringing the total number of operational sites to 196 as of the date of report submittal.

42 out of the 200 Freedom Station sites (21%) are located in qualified low-income areas (PUMAs), exceeding the 20% commitment, and serving a broad demographic range at places they prefer to shop, meet, and play locally, including grocery stores, shopping centers, and malls.

Freedom Stations are open for any electric vehicle and offer multiple forms of payment, including credit card. All stations support both the CHAdEMO and SAE CCS fast charging standards.

158,860 fast charging sessions² were reported in the quarter. Together, these sessions delivered 2,062,598 kWh of electricity.

EVgo and NRG are in compliance with the Make-Readies volumetric building requirement at this time. Overall, EVgo has 793 Make-Readies Sites under contract, representing 6,858 Make-Ready Stubs. Of these, 5,721 Make-Ready Stubs have been installed at 657 sites. 401 of these Make-Ready Stubs at 39 sites were added in the previous quarter.

All Technology Demonstration funds have been allocated, and the three projects are underway. Both EV Opportunity programs were approved by CPUC staff in early 2017. Specific updates for all five projects are provided below.

SECOND AMENDMENT

As reported in the 2016 Annual Report, on February 22, 2017, NRG and the CPUC entered into a Second Amendment to the Agreement. The principal changes set forth in the Second Amendment are as follows:

¹ Capitalized terms not otherwise defined herein shall have the meaning ascribed to such terms in the Long-Term Contract Settlement Agreement (the “Agreement”).

² Utilization reported is for California stations only

- Extended the operating period commitment for the Freedom Stations to December 5, 2020.
- Allocated up to \$12.5M of the \$40M Make-Readies Amount for NRG/EVgo to build at least 10 “Charging Plazas”.
 - Charging Plazas consist of at least 3 DC Fast Chargers with the potential for larger and higher-power chargers.
 - These Charging Plazas will be located in areas with higher concentrations of multi-family dwelling residents and meet other siting and distribution requirements.
 - Charging Plazas must stay operational through at least December 5, 2020.
 - The amount spent on Charging Plazas reduces the Make-Ready Stubs requirement at \$4,000 per stub.
- The Make-Ready Stubs Installation Period was extended through December 5, 2018.
- The Multi-Family Housing minimum requirement for Make-Ready Stub deployment was eliminated.
- Energy storage is now permitted equipment at Freedom Stations and Charging Plazas, and up to \$2.5M of the above-referenced \$12.5M can be utilized for adding energy storage to retrofit existing Freedom Stations.
- Price cap for single-use walk-up pricing at Freedom Stations was increased to \$15; for Charging Plaza fast-chargers greater than 50kW, the price cap for single-use walk-up charging is \$25.

EVgo has already contracted for one High-Power Charging Plaza and is in negotiations for additional sites. Details on the development pipeline will be provided at the end of the report year.

INSTALLATION OF PUBLIC EV CHARGING STATIONS (FREEDOM STATIONS)

As of the Reporting Date, a total of 208 Freedom Station sites were either completed, under construction, or in the permitting process.

The table below summarizes Freedom Station progress throughout the term of the Agreement:

DC Fast Charging Station Progress	Year-End 2013	Year-End 2014	Year-End 2015	Year-End 2016	2017			
					Q1	Q2	Q3	Q4
Sites with Permits Submitted	22	17	3	5	3	3	6	8
Sites with Permits Approved	3	17	7	2	4	4	7	0
Sites under Construction	5	16	11	8	4	3	14	0
Sites Completed	10	56	105	161	166	171	175	200
Completed Sites w/ SAE Combo		23	105	161	166	171	175	200
Completed Sites w/ working credit card readers		3	105	161	166	171	175	200
Completed sites with credit card readers and SAE combo		2	105	161	166	171	175	200
Cumulative Settlement Target	40	100	160	200	200	200	200	200

Installations

During the Reporting Period, EVgo completed construction on 25 additional Freedom Stations, for a total of 200 Freedom Stations. Completed Freedom Stations are listed in [Appendix A](#), with new stations **in bold**.

The Agreement requires a minimum number of Freedom Stations in each of four geographic regions. The table below summarizes the geographic distribution requirements and progress as of the Reporting Date.

Geography	Required	Completed	Percentage	Remaining Requirement
LA Basin	110	94	85%	16
SF Bay Area	55	72	131%	Complete
San Joaquin Valley	15	15	100%	Complete
San Diego County	20	19	95%	1
Total:	200	200		17

As seen in the preceding table, the Minimum Freedom Station Count has been fully met or exceeded in the SF Bay Area and the San Joaquin Valley. Current exceedances will contribute to meeting requirements of the anticipated Freedom Station Savings event, as noted below.

EVgo staff provided a complete briefing to CPUC staff on November 21, 2017 regarding progress in meeting the settlement requirements. At that time, the team outlined the current status of station development and expected savings event that is forecasted to result in 220 total

Freedom Stations constructed for the settlement. Sub-geographic requirements will be fully met in 2018.

Site Development

As of the Reporting Date, 5 additional Freedom Station sites had completed construction and were awaiting utility interconnection, and another 8 sites had been submitted for permitting.

Based on current projections, EVgo anticipates having a Freedom Station Savings Event (as such term is defined in the Agreement), and has begun site planning, development, construction and operation of additional Freedom Station sites and/or expanded capacity as required. Accordingly, with the same budget for 200 Freedom Stations, EVgo is on pace to complete at least 220 by the 2018 deadline.

Low-Income PUMA Distribution

Forty-two of the 200 Freedom Stations are located in low-income PUMAs: 16 in the San Francisco Bay Area, 18 in the Los Angeles Basin, 4 in San Diego County, and 4 in the San Joaquin Valley. They represent 21% of all operational sites, exceeding the goal of 20% in this category.

Assessing Freedom Station distribution by income classification of PUMAs is a device that CPUC and NRG developed for the settlement agreement because no other standards existed at the time. Since then, the Office of Environmental Health Hazard Assessment (OEHHA), on behalf of the California Environmental Protection Agency (CalEPA), developed the California Communities Environmental Health Screening Tool. CalEnviroScreen is a screening methodology that can be used to help identify California communities that are disproportionately burdened by multiple sources of pollution. CalEPA has used the tool to designate California communities as disadvantaged pursuant to Senate Bill 535.

Applying CalEnviroScreen to the Freedom Station distribution for information purposes, as requested by CPUC, shows nearly the same number of qualifying sites (43 out of 200), with a slightly different distribution than the PUMA communities. The results are presented in the table below. NRG and EVgo will continue to assess the distribution by this standard in coming reports to align the state’s environmental justice standards with the settlement infrastructure.

	Operational Sites	PUMA	CalEnviro Screen
LA	94	18	20
SF	72	16	16
SD	19	4	3
SJV	15	4	4
CA- all	200	42 (21.3%)	43 (21.8%)

SAE Combo Rollout Complete

All Freedom Stations support both the SAE combo (CCS) and the CHAdeMo connector standards. This fleet of CCS chargers represents the largest known deployment in the world.

Credit Card Payment Upgrades Complete

All Freedom Stations and all chargers at Freedom Stations are able to accept credit cards via a swipe-card reader. Additional payment mechanisms include RFID cards for EVgo, EZ Charge, BMW ChargeNow, Kia Charge Up, and the new EVgo app. EZ Charge and Kia Charge Up cards are compatible with chargers networked by EVgo, Greenlots, Blink, and AeroVironment. BMW ChargeNow cards also access chargers networked by Chargepoint. Additionally, all EVgo stations are accessible via phone center with customer service phone numbers printed on the stations.

INSTALLATION OF MAKE READY STUBS AND MAKE READY ARRAYS

Status of Make-Readies Sites

Overall, EVgo has 793 Make-Readies Sites under contract, representing 6,858 Make-Ready Stubs. Of these, 5,721 Make-Ready Stubs have been installed at 657 sites, as set forth in [Appendix B](#).

NRG and EVgo have had particular success in reaching disadvantaged communities with this program. For information purposes, CPUC staff requested an analysis of distribution based on the Cal Enviro Screen (CES) standard, which did not exist at the time the settlement was enacted. The distribution is reported in the chart below.

Distribution of Make-Readies by California Enviro-Screen Criteria

Region	CES Qualified Sites			Percent of total sites			CES Qualified Stubs			Percent of total stubs		
	MDU	WP	All	MDU	WP	All	MDU	WP	All	MDU	WP	All
LA	41	29	70	30.1%	22.1%	26.2%	230	208	438	24.7%	19.6%	22.0%
SF	6	25	31	6.0%	27.2%	16.1%	57	244	301	4.8%	32.2%	15.5%
SD	13	8	21	19.1%	14.8%	17.2%	129	60	189	22.0%	13.1%	18.1%
SJV	0	11	11	0.0%	45.8%	40.7%	0	102	102	0.0%	46.4%	39.8%
Total	60	73	133	19.5%	24.3%	21.9%	416	614	1030	15.2%	24.6%	19.7%

Another way to consider make-readies distribution to disadvantaged communities or residents is to consider the percentage of multi-dwelling unit (MDU) properties (and stubs) that have deed-restricted housing units. By this standard, the results look more beneficial at 29.7% of total operational MDU stubs. This is due in part to inclusionary housing requirements in many California communities, where mixed-income housing in single properties is a norm. Thus, residents of low-income housing units as measured by the median income in the region have

reasonable access to the stubs built in this program. That being said, NRG and EVgo have found that a large number of low-income Californians do not have access to regular off-street parking; accordingly, public fast charging remains a critical priority for expanding EV access across demographics.

	Deed Restricted Sites	Percent of total operational MDU sites	Deed Restricted Stubs	Percent of total operational MDU stubs
LA	70	51.5%	433	46.6%
SD	21	21.0%	266	22.5%
SF	16	23.5%	113	19.3%
SJV	0	0.0%	0	0.0%
CA- All	107	34.9%	812	29.7%

Pursuant to Section 4(b)(vi)(B) of the Agreement, EVgo has established a website which identifies each installed Make-Ready Array's location and Start-Up Period expiration date. See <http://www.evgo.com/california-rev-progress/>.

USAGE DATA

EVgo completed 158,860 fast-charging sessions in the Reporting Period at Freedom Station sites and dispensed over 2,062,598 kilowatt-hours of electricity.

This translates to 6.4 million miles driven on electricity in this quarter, displacing 265,252 gallons of gasoline (assuming 3.125 miles per kWh and 24.3 mpg).³

Confidential Appendix C, the original raw usage data for the Reporting Period, will be submitted to the CPUC separately in electronic format.

³ 3.125 mi/kWh derived by AFDC from sales weighted average of 2016 model year vehicles with sales in 2015: 2015 sales from "U.S. Plug-in Electric Vehicle Sales by Model" (<http://www.afdc.energy.gov/data/vehicles.html>); MPG's based on 24.3 MPG CAFÉ Standard (http://www.afdc.energy.gov/vehicles/electric_emissions_sources.html).

TECHNOLOGY DEMONSTRATION PROGRAMS

Stationary Storage Plus Electric Charging (SSPEC)

Project Background

The Stationary Storage Plus Electric Charging (SSPEC) project uses stationary batteries in a technology demonstration application to reduce the cost of operating DC fast chargers (Level 3) and alleviate strain on the grid.

The SSPEC project has successfully:

1. Deployed a test site with microgrid components, including battery storage, solar generation, EV charging infrastructure, and site control technology.
2. Tested various configurations of distributed energy resources and electric vehicle DC fast chargers.
3. Analyzed results from operation of the SSPEC site and historical data from EVgo's charging station network to identify load profiles, potential sites, and utility territories which can benefit most from stationary storage and/or generation on site.

Upon successful economic and operational demonstration, EVgo intends to commercialize these technologies and integrate them into its broader Freedom Station network.⁴

EVgo believes the SSPEC work will enable improved deployment of DC fast chargers by EVgo and third parties at a wider variety of locations. Stations deployed with stationary storage will have a lower total cost of ownership to property owners and electric vehicle service providers (EVSPs) alike.

Previous and Subsequent Quarter Activities

In Q4, EVgo focused on ironing out remaining operational details at the SSPEC site in San Diego, as well as building and identifying additional locations for battery storage. We continued to resolve operational issues at the SSPEC site, and as of the day of report submittal, 2 of 4 chargers were currently available to drivers. Major ongoing issues have been solved by the ALMS bypass, the 3rd charger is scheduled to be turned on before end of the year, and the 4th charger will be energized Q1 2018.

EVgo also made great progress at Union City. The installation is mechanically and electrically complete, with software integration and utility interconnect to follow in early Q1 2018. A final pilot location has been identified in Oceanside. The required energy storage systems are in

storage awaiting installation. The final piece of the SSPEC project will be the commercial deployment of new battery systems. Five locations have been identified as good prospects and EVgo will move forward with operationalizing these sites in the coming months.

For further details, see confidential [Appendix D-1](#).

EV Storage Accelerator (EVSA)

Project Summary

The EV Storage Accelerator (EVSA) aims to demonstrate vehicle-to-grid (V2G) technology as a low-cost energy storage resource. The project will use nine vehicles for the demonstration, three Honda Accord Plug-in Hybrid electric vehicles (PHEV) and six Nissan LEAF Plug-in electric vehicles (PEV). The four primary goals of EVSA are:

- Create a test environment for two major automakers, Nissan and Honda, to gain experience with V2G technologies and prepare them for a further commitment to the technology.
- Advance product readiness for bidirectional inverters, including listing standards and product certification.
- Identify use cases for V2G and test vehicles against those use cases.
- Inform public policy around the system, ratepayer and customer benefits of V2G.

For a more detailed report on the scope of work and related activities, please refer to the Final Scope of work – October 2015 as well as the Revised EVSA Scope of Work – August 2017.

Previous Quarter Activities

Use Cases: The EVSA Project Team continued to work on executing the outlined use cases. The Interconnection use case continued to take the most time and effort in Q4 2017 due to ongoing discussions with SDG&E and UCSD regarding the challenges associated with: (1) interconnecting vehicles with on-board inverters and (2) meeting the new smart inverter requirements in California, as dictated by Electric Rule 21. At the time of writing, discussions were ongoing between UCSD and SDG&E regarding whether or not the assets under the EVSA project sited on the UCSD micro-grid needed interconnection applications. The outcome of the discussions will dictate whether the project vehicles can execute bi-directional energy flow or be limited to uni-directional smart charging.

The second use case, Transformer Upgrade Deferral, continued to move forward with site modifications and technical implementation. However, without resolution on discussions between UCSD and SDG&E mentioned above, the use case is on hold because both of the vehicles planned to be used (Honda Accord PHEVs and Chrysler Pacifica PHEVs) have on-board inverters and therefore fall outside of current interconnection frameworks available in California.

The third use case, Emergency Power Back-Up, was put on hold in Q4 to focus on pushing forward the project-critical Interconnection use case.

The Value of V2G use case continued to make progress in Q4. Princeton Power and Nuvve worked to integrate the CA-10 units with the Nuvve aggregator. The integration, once complete, will allow the stations to respond to signals from the aggregator and be simulated to follow CAISO's frequency regulation market signal. However, the ability to discharge will again be dictated by the outcome of the Interconnection use case. The collection of data through Nuvve's aggregator for at least 2 of the stations is planned to commence before the end of December.

Charging Stations: The 5 Princeton Power Systems (PPS) stations located on the UCSD micro-grid (excluding Trade Street) achieved consistent operations in Q4 due to the ongoing troubleshooting efforts of Princeton Power. The Trade Street station has not been in consistent operation due to the need to complete an interconnection application with SDG&E. A key component of the application was to UL-field list the PPS unit. This was completed in mid-October and is currently being reviewed by SDG&E. The unit sited at Scripps experienced significant damage due to a voltage spike but was fixed in December and is now fully operational.

Vehicles: Five out of the six Nissan LEAF vehicles are currently being consistently driven by project participants. New drivers were recruited for Scripps and the Police Department, and a sixth and final driver has been identified for the Trade Street location. The two Honda Accords also have drivers assigned to them. The third Honda Accord will most likely not participate in the project due to the barriers associated with interconnection of an on-board inverter.

Deliverables: No deliverables were due this quarter per updates to the scope of work.

Subsequent Quarter Activities

UCSD and SDG&E discussions regarding the necessity of interconnection applications for assets on the UCSD micro-grid will be resolved. The resolution will dictate the next steps for the project – if assets are required to submit applications, they will not be approved because they do not satisfy requirements under Rule 21. Therefore, in order to continue the project, the vehicles will need to execute uni-directional “smart charging” rather than full bi-directional V2G. If the assets are not required to submit applications, the project and its outlined use cases can continue as planned.

Regardless, all project EVSEs (6 Princeton Power CA-10s and 2 Nuvve PowerPorts) will be integrated with the Nuvve aggregator to allow for streamlined dispatching of charging / discharging signals. Data will be collected on all 8 project EVSEs and corresponding EVs, including charging sessions duration, kW, V and Amps. The Trade Street CA-10 unit will be approved for interconnection and a driver will be assigned to the Trade Street LEAF vehicle.

The Project Team will complete the Product Commercialization Roadmap Deliverable.

For further details, see confidential [Appendix D-2](#).

Extreme High Power DC Charging Station

Project Background

Automakers are continuing to increase range of EVs by increasing battery capacities, as evidenced by the late-2016 release of the all-electric Chevy Bolt with 238 miles of range. To maintain a consistent customer / EV driver experience regarding charge duration and SOC (State of Charge) completion percentage, DC EVSE infrastructure must increase the power level of charging infrastructure (i.e. increase the rate at which energy is delivered into the electric vehicle battery).

This project is intended to bring auto OEMs, EVSE, and cable manufacturers together to demonstrate and facilitate testing and development of standards and equipment. The project will do the following:

Deploy first of its kind EVSE infrastructure capable of high-power DC charging (300+ amps).

Test with auto OEMs and EVSE providers to allow for test bed and development of standards.

Previous Quarter Activities

EVgo's high-power charging station in Baker, CA underwent a geotechnical examination of the soil which led to substantial change orders on the project due to unsuitable and unstable soil conditions. Sizable portions of the Baker site had to be dug down deeper than expected to have debris removed and had to be built back up to satisfactory conditions to support canopy and equipment.

The unexpected soils condition led to project delays as well as cost overruns and, although still within budget, has made the station more expensive than originally expected. The difficulty surrounding the soil conditions have been overcome and work is progressing. A retaining wall had to be constructed to support the weight of the equipment enclosure at one end of the parking lot.

The solar canopy has been delivered to the site and erected. Conduit has been run from the equipment enclosure to the solar canopy and ABB's prototype 150 kW charger dispensers are on site. Purchase orders have been placed for (3) of ABB's production 150 kW charger dispensers and (2) of BTC's 150 kW chargers. The ABB production dispensers and BTC 150 kW chargers are being built and will be shipped and installed at the Baker high-power charging station in Q1 2018.

The Baker station is expected to have substantial construction completion in January and be able to be turned on in February 2018. We will receive the final shipment of high-power charging

equipment in late February and plan to have the station fully operational in March 2018 with all high-power charging equipment installed.

EVgo installed the first 150 kW high-powered charging pedestal at its Fremont station in 2017 but at the time of installation only a prototype dispenser pedestal was available from ABB. EVgo has purchased a “production” high-power charge post capable of full specifications and EVgo will swap out the prototype dispenser in Q1 2018.

In Q4 2017 EVgo has had talks with OEMs around high-power charging for prototype vehicles. Once the Fremont station has ABB’s production charge post and Baker site is fully operational, EVgo will be able to offer high-power testing (@ 150 kW) to OEMs in northern and southern California.

EV OPPORTUNITY PROJECTS

The EV Opportunity Program under the Agreement consists of \$4 million toward “...Enhancing the appreciation of the social benefits of electric vehicles and creating opportunities for residents of underserved communities to benefit from expanded use of electric vehicles.” More specifically, the EV Opportunity Program Amount may be used to fund: a) the deployment of electric vehicle charging infrastructure to support electric vehicle car-sharing projects, in particular in low-income areas within the State of California, b) an EV job training program and c) other projects consistent with the objectives of Section 4(d)(ii) of the Agreement. EVgo has a scheduled briefing on these projects for CPUC staff on January 8, 2018.

In Q1 2017, two Opportunity Program project proposals that EVgo submitted for the CPUC’s review were approved: Green Raiteros and Electric Access Charging Hub (EACH). In Q2 2017, EVgo began preparing for the Q3 2017 Green Raiteros project kick-off and completed the EACH project kick-off. Q3 progress for Green Raiteros includes executing a program kickoff meeting, forming a stakeholder advisory committee, establishing Valley LEAP’s non-profit business status in order to manage Green Raiteros, and initiating a hiring process for an operations manager to expand the Green Raiteros business plan. EACH updates in Q3 included preliminary site identification in all three target areas and finalized partnerships with advising nonprofit organizations for project management, marketing and outreach, as well as program evaluation.

Throughout Q4, the Green Raiteros pilot program has focused on infrastructure and business capacity expansion. EACH has seen further development in site acquisition and increased engagement from project advisor the Shared-Use Mobility Center. Summaries of these activities and ongoing project schedules are included herein.

Green Raiteros

The Green Raiteros Pilot Project is being executed in partnership with the San Joaquin Valley Latino Environmental Advancement Project (Valley LEAP), the Fresno County Rural Transit Authority (FCRTA), the Shared Use Mobility Center (SUMC), and West Hills Community College. The Green Raiteros Pilot builds on an existing grassroots ridesharing program – the Raiteros – and expands access to carbon-free mobility in the Central Valley by strategically and

sustainably introducing EVs to the Raiteros' services. EVgo worked with Valley LEAP to apply for the 11th Hour Project Just Transit Challenge, a fund dedicated to reducing emissions while increasing equitable transportation options. This funding was awarded in Q2 and will be used to acquire two 2017 Chevy Bolts for the Green Raiteros Pilot Program.

To facilitate the Green Raiteros business model and recruit staff, Valley LEAP has established the LEAP Institute, a 501(c)3 nonprofit focused on climate and economic justice. For the 18-month period of support provided by EVgo's settlement with the CPUC, the LEAP Institute will administer budget items pertaining to staff hiring and business model development, establishing a sustainable business plan that allows for ongoing funding and support from outside sources. As an initial step, an Operations Manager job description has been publicized. Additionally, key staff from Raiteros and Valley LEAP traveled to Watertown, NY, to further understand existing business practices surrounding insurance models, vehicle ownership, grant solicitation, and software development from the Volunteer Transportation Center (VTC), an established rural ridesourcing organization. As a result of this trip, the LEAP Institute has entered in a Memorandum of Understanding with VTC to utilize their existing software to enhance the Raiteros' ability to schedule and complete rides.

In light of this progress in both business and site development, EVgo hosted an initial stakeholder meeting in August, 2017. Participating organizations included the Center for Energy Efficiency and Renewable Technology (CEERT), Center for Sustainable Energy (CSE), Clinica Sierra Vista, Fresno Council of Governments (FCOG), Greenlining Institute, Fresno County Rural Transit Authority (FCRTA), Fresno Economic Opportunities Commission (EOC), Office of Assembly member Arambula, and the University of California, Davis. These organizations have formed an advisory committee to work with EVgo and SUMC to build a sustainable business plan and ensure ongoing success of Green Raiteros.

Throughout Q4, SUMC has continued to work toward completing a first draft business plan to be reviewed by both Valley LEAP and EVgo. This plan culminates from a national best practices review as well as a series of interviews with local stakeholders and existing Raiteros. It includes recommendations on fleet ownership, reimbursement strategies, and insurance models, and is intended to provide a roadmap for Green Raiteros to expand its existing service beyond EVgo's funding commitments. A complete and final business expansion plan is expected in Q1 of 2018.

After reviewing multiple contractor bids, Green Raiteros' headquarter construction is beginning in Huron, CA. The headquarters will house two Chevy Bolts to be purchased by Valley LEAP, provide 9 make ready stubs as well as 4 level 2 chargers, and serve as a coordination facility for drivers and passengers. New site identification is also in process for high speed charging in LeMoore, due to unforeseen complications at West Hills College.

As planned, Green Raiteros has also worked to identify future funding sources. With a competitive proposal submitted to the Fresno Transformative Climate Communities, a project administered through the Strategic Growth Council, the Clean Shared Mobility Network will provide for ten additional carshare stations, including a minimum of 5 level 2 and level 3 chargers each, and 42 electric vehicles that will be leveraged to expand existing Green Raiteros'

service. This proposal aims to enhance electrification and shared mobility strategies in Fresno, and will be funded at over \$9 million.

A second advisory committee is scheduled for mid-January, 2018, at which point the Green Raiteros Operations Manager will be onboarded and prepared to lead ongoing coordination efforts. Ribbon cutting for Green Raiteros is scheduled for March 2018, after which all partners will engage in ongoing community outreach and education efforts to increase awareness and participation in this platform, and work toward further EV adoption in Huron.

EACH

The main focus of the Electric Access Charging Hub (EACH) project is to create EV access and job opportunities to underserved communities. EVgo is developing seven EV-charging hubs in low-income communities of the San Francisco Bay Area, Los Angeles, and San Diego that will serve the public as well as electric carshare vehicles. The EACH project aims to support EV carsharing, create job opportunities, provide publicly available EV fast charging, and spur the adoption of electric vehicles in underserved neighborhoods.

In Q2 2017, EVgo conducted an internal kick-off meeting and began site development and preliminary partnership discussions with entities including: the city of San Francisco, the city of Oakland, the city of Richmond, Los Angeles Department of Transportation, Los Angeles County Metropolitan Transportation Authority, and Grid Alternatives. Several additional communities expressed interest in public-private partnerships around ridesharing applications that serve disadvantaged communities. As a named partner and statewide coordinator tasked with creating an advisory committee for EACH programming, SUMC began interviews in Q3 2017 to further evaluate the potential for these partnerships. With input from this committee, SUMC will provide recommendations for EACH program design including site evaluation, carshare partnership models, and potential grant program identification to support EV adoption in low income and disadvantaged communities. EVgo has also solidified a partnership with the Center for Sustainable Energy (CSE) who will oversee marketing and outreach strategies, coordinate with community based organizations and local nonprofits, and conduct program evaluation. To ensure consistency and coordination, EVgo, SUMC, and CSE began initial coordination efforts in Q3.

In Q4, SUMC has increased engagement in EACH project administration. They have worked to identify potential partners and connect EVgo with additional site identification in all three regions. Their work in Q4 will culminate in a state of the industry memo to EVgo, highlighting recommendations on carshare partnership models and site suitability, a synthesis of findings from stakeholder interviews, and potential alignment with additional funding sources.

As nonprofit participation moves forward, EVgo, SUMC, and CSE are looking to Q1 of 2018 for an all hands meeting in Los Angeles. This will allow for discussion surrounding clarity of roles and responsibilities, timelines, and deliverables for each partner organization. Additional team meetings will be led by SUMC on a regular basis throughout the duration of the EACH project. Once stakeholders are identified, and an advisory committee has been created, meetings among

these organizations will be organized as well. At this time, CSE is working to identify partner CBOs, but will not begin developing specific outreach strategies until 2018.

Appendix A

Freedom Station Table

See attached.

APPENDIX A - Freedom Station Detail
Dated as of: December 5, 2017

<u>Name</u>	<u>Street Address</u>	<u>City</u>	<u>Region</u>	<u>Operational Date</u>	<u>PUMA</u>	<u>Both SAE & CC</u>	<u>CES</u>	
SF Bay Area								
1 Westlake Shopping Center	75 Southgate Ave.	Daly City	SF Bay Area	6/24/2013		x	x
